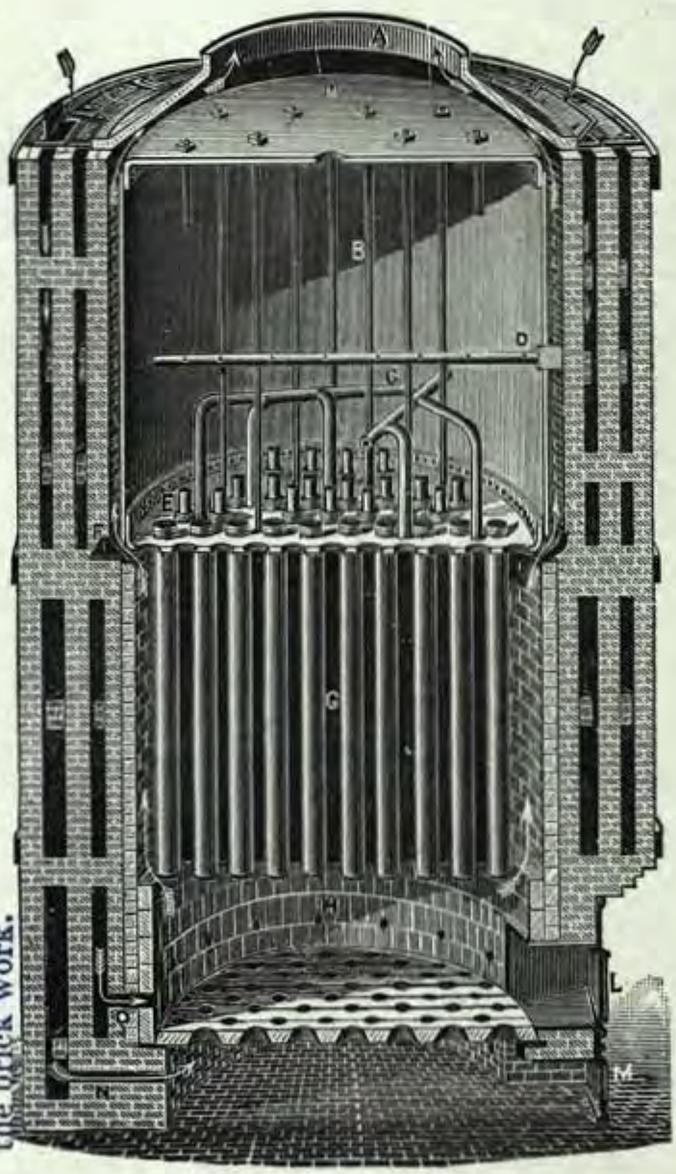
McLAUTHLIN'S

PATENT



DROP-TUBE SAFETY STEAM BOILERS,

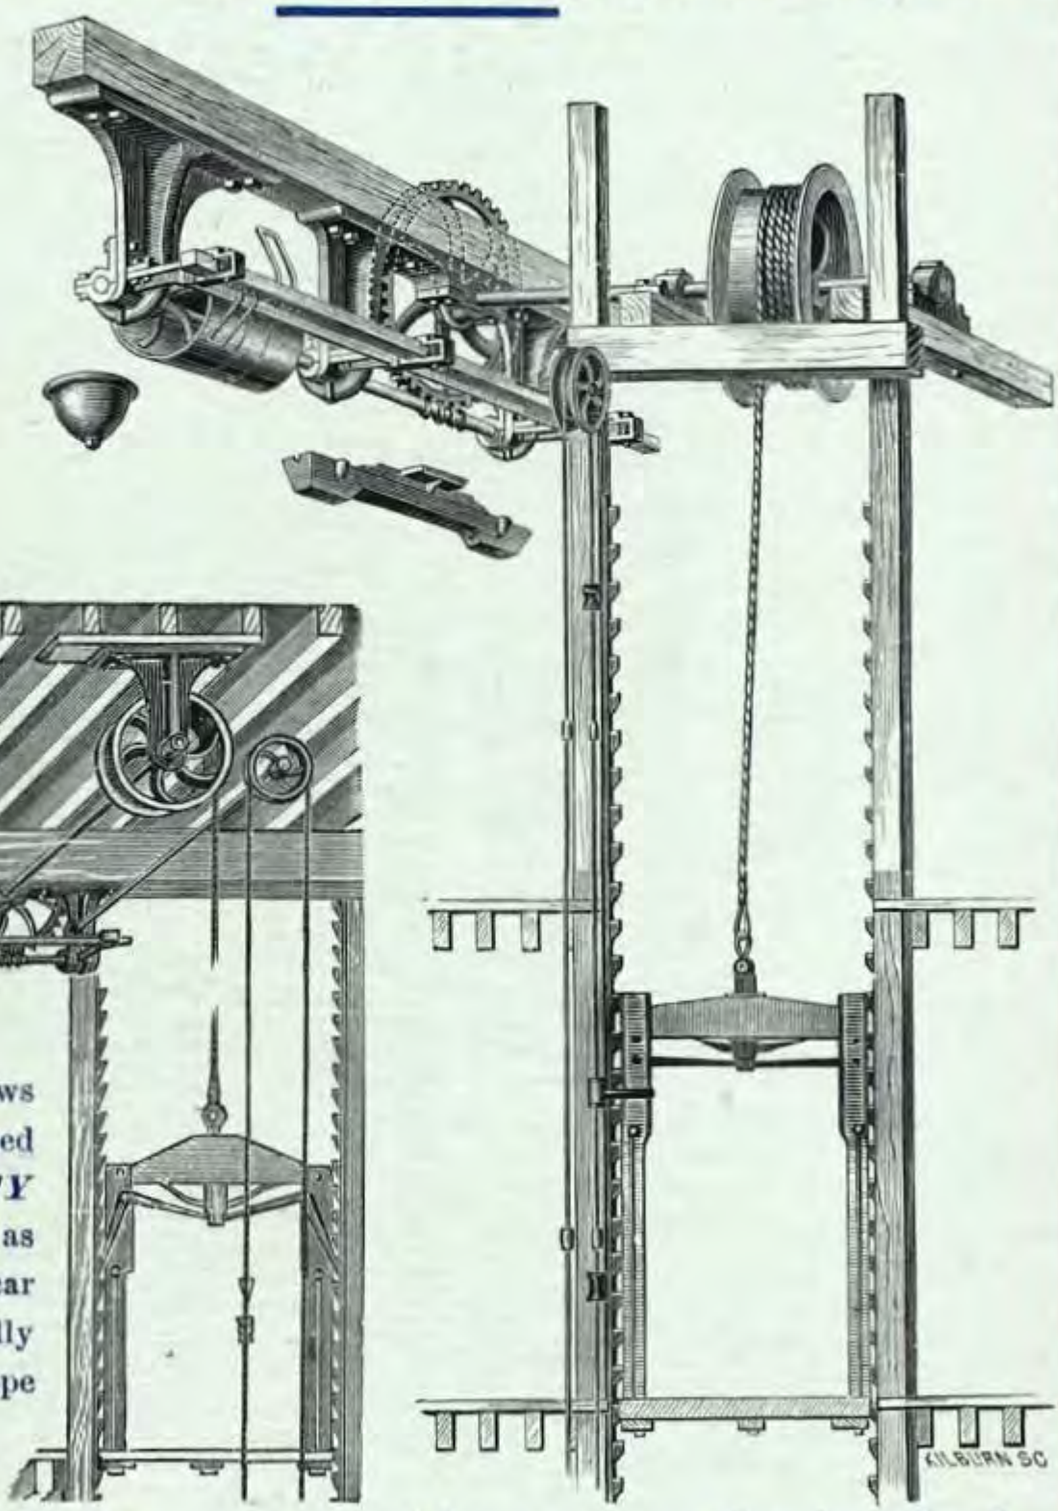
COMBINING

Large steam and water space; perfect circulation; entire freedom from unequal expansion; ample heating surfaces; superior draft; suspension entirely within the fire chamber; protected brick work,—the supply of air passing down its air spaces, which also prevents waste of heat through it;—manifold safety blow-off,—which, combined with the enforced circulation, admits of using water that would prove dangerous in ordinary boilers;—distributive safety feed, etc., etc.

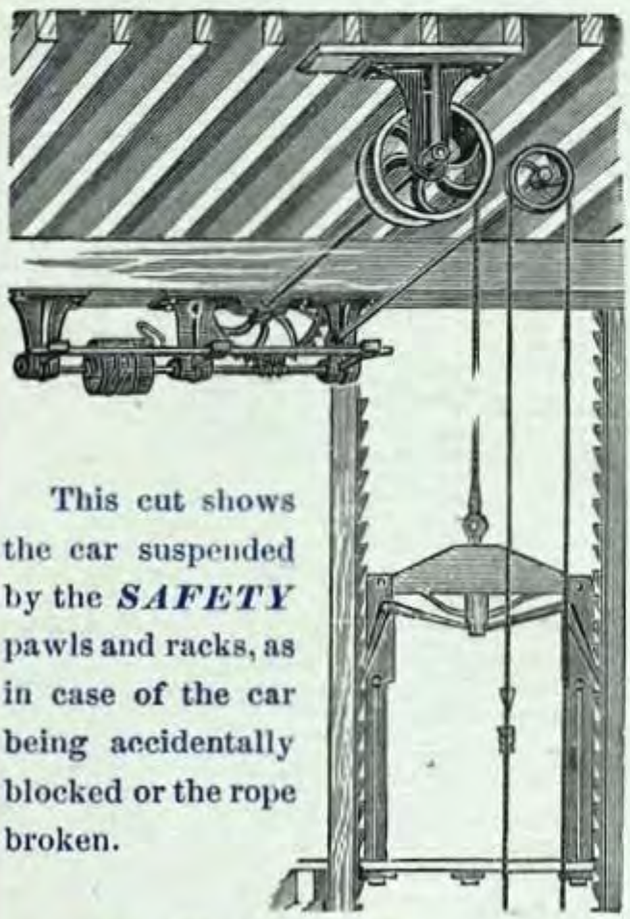
THE LARGE CUT IS A VERTICAL SECTIONAL VIEW.

A, central smoke flue; B, Steam and water cylinder; G, water tubes projecting through tube sheet; C, manifold blow-off, drawing from surface of crown sheet; D, distributive safety feed pipe; F, supporting rings, having lugs on which boiler rests. Ascending arrows show boiler entirely enveloped in the fire and gases. Descending arrows show supply of air through the brick work.

THE SMALL CUT



shows one of the tubes enlarged, the fire-tube J K in section. Circulating tube E rests on centering lugs on plug K. The tube guide at the top sustains itself fly spring pressure, and receives tube E loosely within it.



These Boilers have proved, by fourteen years' use, remarkably economical and free from repairs or accident. They are made only of superior strength, materials and workmanship, and are sold at the price of ordinary horizontal tubular boilers.

PASSENGER, FREIGHT, CARRIAGE & HAND

ELEVATORS,

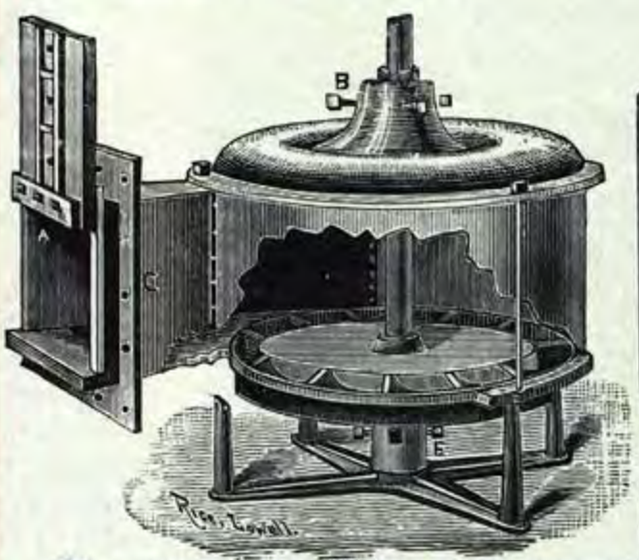
HOISTING WHEELS, HATCH COVERS, &c., &c.

This cut shows the car suspended by the ***SAFETY*** pawls and racks, as in case of the car being accidentally blocked or the rope broken.

Our Freight Elevators are without a competitor in price for an Elevator of their class. They are very extensively adopted, and *none* are operated with better satisfaction.

The cuts are imperfect, but give a general idea as put up on the simplest and most durable plan.

We get them up in styles to meet all locations and uses.



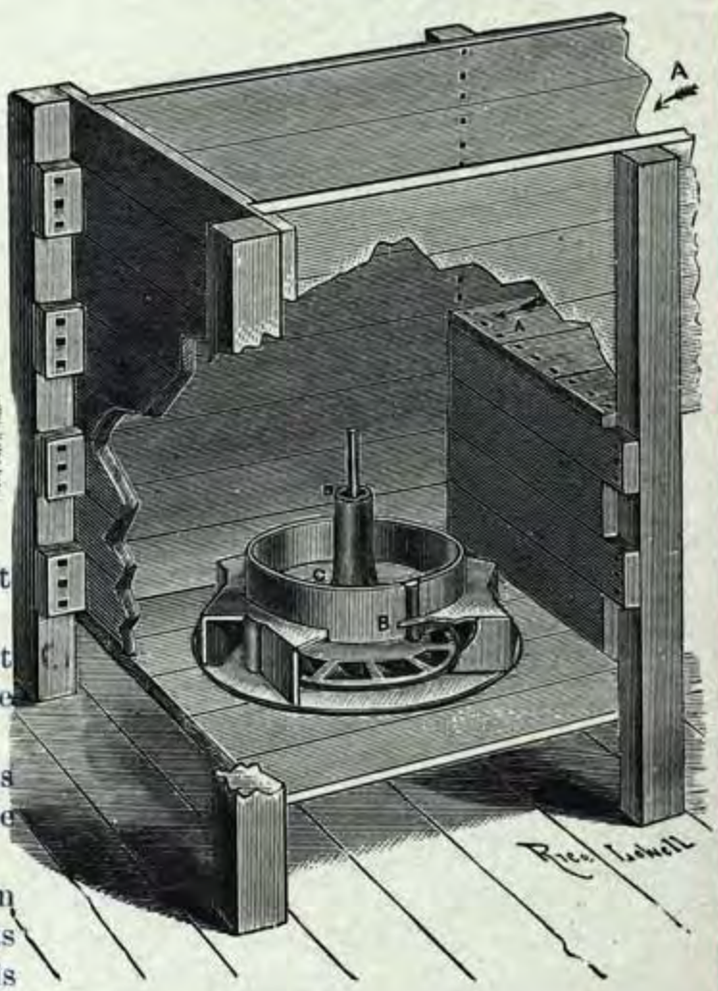
TEST TURBINE WATER WHEELS.

Over thirty years' experience in the Water-Wheel business, and a series of **5300 of the most accurate comparative test experiments on record,** have led to the production of our

No. 1 and No. 2 TEST TURBINES.

We claim that for a term of years, working under the conditions that mills are generally subject to, the ***No. 1*** *has not its equal in average economy of water, and freedom from care, interruptions and delays; and that the* ***No. 2*** *is not excelled by any Wheels that can be furnished and put in at so little cost.*

No. 2 Test Turbine.



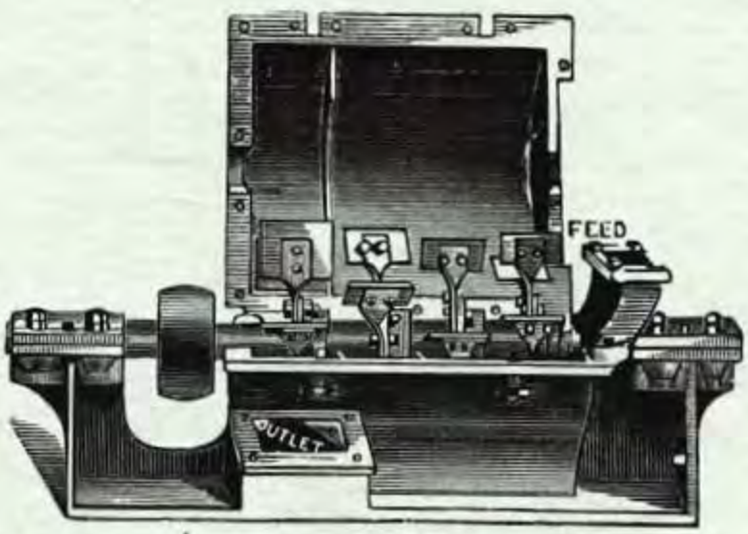
The upper parts of the shafts are not shown.

The No. 2 is in iron casing. It is set outside of the flume. We also fit these with wood casing.

In the No. 1 the water discharges under the flume bottom, on which the Wheel is set.

The gate B C is open. It slides within the spout case, closing upon a seat at its rim, near the level of the Wheel. It is proof against leakage and wear.

No. 1 Test Turbine.



The AMERICAN WATER WHEEL CO.

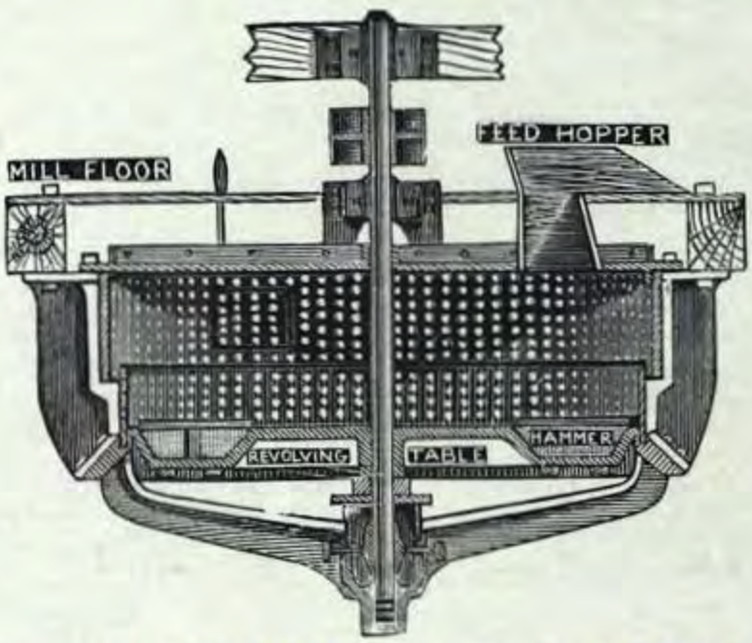
We have purchased all the Stock, Patterns, Patents and good will of the AMERICAN WATER WHEEL CO., through Mr. A. Warren, the former agent, and are prepared to execute orders *at reduced prices.*

THE PATENT

MAGIC PULVERIZER

Has proved by years of *PRACTICAL WORK* its superiority for pulverizing **FRIABLE AND SEMI-FRIABLE MATERIALS.** No dressing or sharpening is required, and the wearing parts are easily replaced.

It consists of a Horizontal Cylindrical Case, with a rapidly revolving shaft carrying STEEL PADDLES in the first part, and EXHAUST FANS in the second, the combined operation of which creates concussive action of the grains upon each other in millions and in numberless repetitions, the material only escaping the combating vortices by the exhaust current, which is regulated for the fineness required.



It has been successfully used on a wonderful variety of materials, including **Ores, Minerals, Mica, Glue, Bones, Asbestos, Sugar, Grains, Dried Roots, Paints, Chemicals, Fertilizers, etc.,** and for GRANULATING corn, meal, glue, etc. It has also proved valuable for TRITURATING LIQUIDS.

The engraving shows a small machine thrown open to show the internal parts.

A hopper to be placed at the "FEED" aperture conducts the material into the machine. The "OUTLET" is to be connected by a pipe to a large settling chamber, into which the pulverized material is discharged. The diaphragm seen within the casing is proportioned for **medium work**; for coarse it is made **narrower**, and for fine, **wider.**

THE PATENT

MAGIC CRUSHER

Is adapted to all **FRIABLE** and most **SEMI-FRIABLE** substances, as proved by years of practical use. It consists of a Revolving Table, with Steel Hammers attached, placed upon a vertical shaft, and surrounded by a perforated casing, within which it revolves and through which the crushed material is discharged. The grade is controlled by the size of the perforations in the casing.

—The Material thrown in receives at the rate of 5000—
——Shattering or Rending Blows per Minute, of a——
————force due to a velocity of two to three————
————miles per minute.————

No Crusher known works with less power or less wear and repairs. It crushes easily **FIVE TONS AN HOUR,** and **COSTS LESS** than any other of similar capacity.

The Cut is a vertical sectional view.

Fire Alarm Telegraph.

Superintendent, BROWN S. FLANDERS. Salary, $2,600, with use of horse and vehicle. He has also the care of all the public bells and clocks. Office, City Hall. [Appointed by the Fire Com'rs.]

Asst. Supt., Cyrus A. George. Salary, $4.75 per day. *Operators*, Charles M. Chaplin, Uzziel Putnam, James L. Crowley. Salary, $4.00 per day. *Foreman of Construction*, William H. Godfrey. Salary, $4.50 per day. *Repairers*, George S. Thom, $4.00 per day. J. M. Morris, G. S. Mendell, J. W. Bird, John Flavell, Issachar Wells, Wm. H. Barker. *Batteryman*, J. L. Gethins.

A constant watch is kept at the office, City Hall, night and day, by the operators. An accurate account is kept of the time of giving each alarm, and of the station from which it originates. The police officers, and one other person resident near each station, have keys to the Boxes. Alarms are usually given in about half a minute from the time the Box is operated.

The striking of the Bells and the Engine House Gongs, each denote the number of the Station from which the alarm originated: thus,—one blow, a pause, three blows, another pause, and two blows (1—3—2) indicates that the alarm came from Box No. 132. Second alarms are sounded by striking ten blows followed by the box number. Third alarms are sounded by striking ten blows twice, followed by the box number; if the entire department is wanted, alarms are sounded by striking twelve blows twice, followed by the box number; Return Signal, notice will be given on the bells and gongs, one blow four times, thus: (1—1—1—1,) hearing which the several apparatus on the way to the fire will return to their quarters; (2—2) indicates no School; eleven blows indicates Police call; 189 indicates a call from Deer Island; 198 indicates a call from Chelsea.

The Meridian Bells.

Fifty bells, One Hundred and One gongs, Sixty tappers, and Fifteen vibrators, at various locations, on Churches, School-houses, Engine houses, and Railroad depots, are struck from the Fire Alarm Office precisely at noon every day. Correct time is furnished by telegraph from Cambridge Observatory, so that absolute accuracy is secured.

WHEELER'S

ECLIPSE WINDMILL

Is the favorite, wherever known; has received more honors than anything of the kind ever constructed. It took the highest award at the Centennial and at four World's Fairs; also, at the National Exhibition of Railroad Appliances. It received Five Silver Medals from the N. E. Fair, and has taken First Prize at every State Fair in N. E., where it has come into working competition with other mills. It has been tested 18 years; over 20,000 in use. Its almost perfect mechanism renders it thoroughly efficient. Automatic, storm-proof, and noiseless. It has *no Friction Balls* or other loose joints to impair its efficiency or shorten its life. Those parts of the Eclipse taking the most strain are of wrought iron, and all wearing parts are machine finished. It is the longest stroke mill, and is the *only Solid Wheel Mill which stands square to the wind* when at work, and squarely out of the wind when not at work. It needs no *friction brake to stop it.* The Eclipse is no "clap trap" affair, built to be auctioned off for whatever is bid, but is a standard article, costing one man as much as another. We send experienced men to put up jobs. No dishonest agents or workmen are tolerated. Our Warehouse is the largest one East of Chicago, where Windmills, Pumps, Tanks and other water supply materials are kept constantly on hand.

Full satisfaction guaranteed to patrons. Large Railroad jobs filled at short notice. Geared Windmills for Power, with all necessary machinery supplied. ☞For Circulars apply to

PATENT ENAMELED WATER GAUGE GLASSES.

The height of the water can always be seen at a great distance and in dark situations; you can also see at a glance whether the water is above the top or down below the bottom gauge. In ordinary tubes or glasses it is almost impossible to ascertain whether the boiler is full of water or otherwise.

The water in these Patent Tubes is reflected from a white enameled strip in the glass, showing the water white as milk, and thus producing the result described. We respectfully solicit a trial, the advantages being such that, if once tried, they will always be used.

BANKERS,
230 Washington St., near State St.,
BOSTON.

After years of experience and a careful study of the business of loaning money on personal property, we have at last perfected a system, whereby the publicity usual in such cases is done away with. We are prepared to make loans for a day, a week, a month or a year. We provide a safe and easy way of obtaining loans on household furniture, horses, carriages, etc., which can remain undisturbed in possession of the owner, a note at a fair rate of interest being all that we require. All loans may be paid off by instalments if desired, but if this is not convenient, the loan can lie just as long as the borrower wishes. We also loan on diamonds, watches, plate, jewelry, etc., and these are at once placed in our large safety vault, and guaranteed, as is not done by any other house in Boston, against fire and theft. We keep money always on hand for good second mortgages on real estate, and our office is so well arranged that you can consult us in the strictest secrecy without coming in contact with others; or we will call at your residence if you will drop us a line by mail. Office hours from 9 o'clock to 5 o'clock.

We would specially call the attention of the public to our system of heating by Indirect Radiation, by which one-third, two-thirds, or all the heating surface may be used as the severity of the weather requires, thus securing an adjustment of heat that cannot be obtained by the old indirect system; whereby all the heating surface must be used or none at all; thereby causing the overheating of rooms when but little heat is needed, and proving inadequate to the necessities of severer weather.

SHEET METAL CORNICES, MOULDINGS & ORNAMENTS OF COPPER & GALVANIZED IRON.

WE MAKE A SPECIALTY OF

Austin's Patent Expanding Water Conductor, or Rain Water Spout, for which we are the Sole Agents for Boston and Vicinity,

Its merits need only be known to be adopted, as the increase of our yearly sales indicate. It is the ORIGINAL and ONLY legitimate Expanding Conductor in the market, and is warranted not to burst by freezing. It is made from the best of Iron and Galvanized after it is made, thereby filling the seams and galvanizing every part thoroughly. Metal workers will see the advantage of this, on account of the galvanizing not being broken and leaving the iron exposed, as is the case with conductors made from the sheet and put through a machine. It has no loose seam to leak or strain apart. It comes in nine-foot lengths, fitted for loose joints or soldering, and elbows that can be used for goose necks or offsets and shoes. Sizes, 2 to 8 inch diameter. The price will be kept as low as possible. List and samples sent on application.

A LARGE ASSORTMENT OF BEST PATTERNS from which to select, to meet the requirements of each case. If convenient, persons requiring Trusses should call at our establishment, where they can have a suitable Truss, carefully fitted by a competent and experienced person familiar with the anatomy of hernia. When a call in person is impracticable, a careful description should be sent, stating whether the rupture is on the right or left side; also the measure around the person, two inches below the top of the hip bones. If the rupture is at the navel, the measure should be around the body at the navel.

"1503. CODMAN & SHURTLEFF, Boston, Mass. One Case Surgical Instruments and Atomizers.

"The Committee have no hesitation in awarding for this superb exhibition the highest premium. * * * The various other instruments for inhalation of atomized liquids, and for Local Anæsthesia, were all apparently faultless, both in design and workmanship. The exhibitors are regarded as more especially deserving of the highest token of merit for having produced nothing except their own manufacture.

GOLD MEDAL. (Signed) GILMAN KIMBALL, M.D., Chairman."

STAINED GLASS

SUBSTITUTE.

PATENT "GLACIER" WINDOW DECORATION,

The Most Perfect Substitute for Stained Glass.

Manufactured at the Lisenhall Works, Belfast, Ireland.

Gill & Higgins, Agts., 79 Milk St., Room 2 A.

This is a series of designs from the simplest to the most elaborate, with all the beauty of the real stained glass, at about one-tenth the cost, and is easily applied and simply arranged to cover any space. Unlike many things invented for the purpose of window decoration, this cannot be rubbed off the window or defaced by cleaning; once affixed and dried, it is insoluble in water, and will not crack, or leave the glass under the action of heat, cold, or moisture. It is especially adapted for top lights in stair landings, fan-lights, door panels, and side lights; bath rooms, conservatories, windows in churches, schools, libraries, etc., and wherever there is a disagreeable outlook. Send for illustrated circular and price-list, or to better appreciate its merits and worth, call and examine. Safely forwarded by mail. All orders promptly filled.

ELECTRIC POWER.

Those who use power will find it to their advantage to examine this Company's system of renting it.

The power is transmitted by wire from a central station, and is obtained as easily as gas and water, by the simple turn of a switch. By this system no fire is required, there is no care of boiler or engine, no dirt from coal and ashes, no heat in summer, and no increase of insurance rate, as it has been pronounced especially safe by the Board of Underwriters. It is adapted to railroads, and all kinds of machinery, printing presses, sewing machines, lathes and drills, for sawing and planing, for elevators, and ventilating fans, also for working in mines and like places, where from lack of room it has been impossible to introduce power.

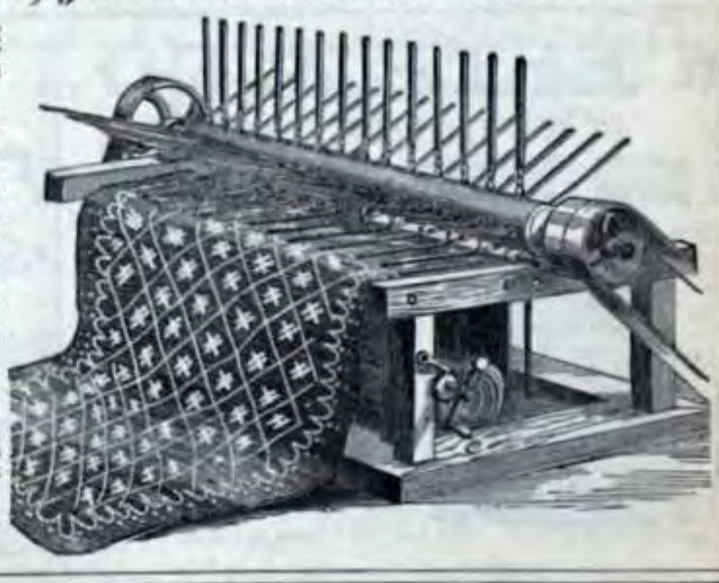
THE RICHARD SMART



CARPET BEATING CO.,

No. 6 Brighton Avenue, junction Beacon Street.

An entire new building, with two airy rooms for Cleaning Carpets, a brick boiler house, containing a 20-horse power Steam Engine, makes this the foremost establishment of the kind in the New England States.

With our new Carpet Beating Machine, the **INVINCIBLE**, just patented by CHURCH & DOW, we are prepared to give our customers quicker and better work than heretofore.

Being established in 1852, near where the Public Garden now is, and when that now beautiful locality was a swamp, covered with cat-o'-nine-tails, and peopled with bull frogs, and when up and down Commonwealth Avenue, Marlboro' and Newbury Streets that now are, the boys busied themselves shooting plover or spearing eels, having had to move *eight* times for the march of improvement, and reach our present location, we think we have fairly earned the reputation of being a Back Bay Institution, and the "Star" Carpet Beating Establishment of Boston.

Expresses from Jamaica Plain, Newton, Newtonville, Brighton, Watertown and Brookline pass our door daily, giving our suburban customers a chance to get their Carpets Cleaned and returned the same day, a privilege they are fast finding out.

WARREN'S

NATURAL ASPHALT ROOFING.

ANCHOR BRAND.

An outgrowth of over thirty-five years' experience in felt and gravel roofing, in both warm and cold climates, embracing about thirty years in New England and Canada.

TRADE MARK.

The chief advantage of this Roofing consists in its *great durability.* This is due to the *remarkable fact* that the *Natural Asphalt materials are not injuriously affected by atmospheric agencies;* especially that they *will not dry up and become brittle by evaporation.*

This Roofing is already in extensive use on a large number of the most costly and elegant mercantile buildings, dwellings, manufactories, railroad buildings, etc., many of which are of great value and of enormous dimensions; an aggregate of many millions of square feet of it having been laid within the last eight years.

THIS COMPANY CONTINUE TO DO A

GENERAL ROOFING BUSINESS

With Promptness and Satisfaction to its numerous patrons.
